

Homework Week 2 Day 1

Coding

Create an application to have the following features

2. The user should be able to navigate to the following activities

a. Picture Activity

- to take a picture from the phone and show it in the ImageView.

b. EMI Activity

- Have a EMI calculator which updates the textview with an integer value which can be updated using a “seekbar” as we move it left and right. And calculate the EMI.

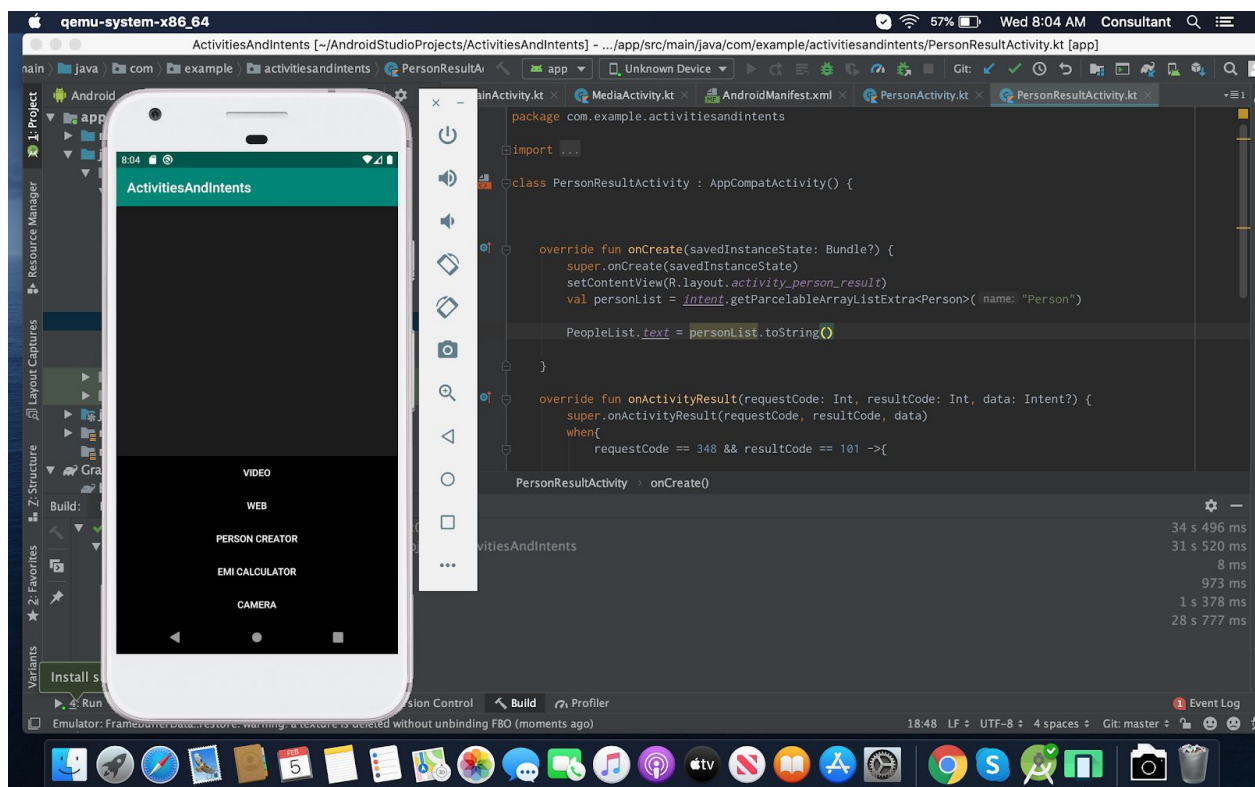

c. Person Activity

d. Person Result Activity

- have a user form to add person object and then pass the list of persons to the another activity to view all persons in a textview

e. At least 2 other activities

- Play with some widgets (Media Player, Web View, etc)

The only activity that doesn't fully work is the Person activity, although it might be fixed by the time you get to it.
